

Secure, Fast and Cost Effective

Innovate your welcome

Streamline and automate visitor registration using our fast and efficient check-in apps with ID Scan. Create positive and lasting impressions for your guests.

Our Mobile and web app have integrated ID Scanners for automatic data extraction from ID's or Passports, QR Code Scan and Facial Recognition. Soja Apps makes the whole process efficient and every visit count.

Check in Visitors in 20 seconds or less

Collect, verify and securely store your data in real time.

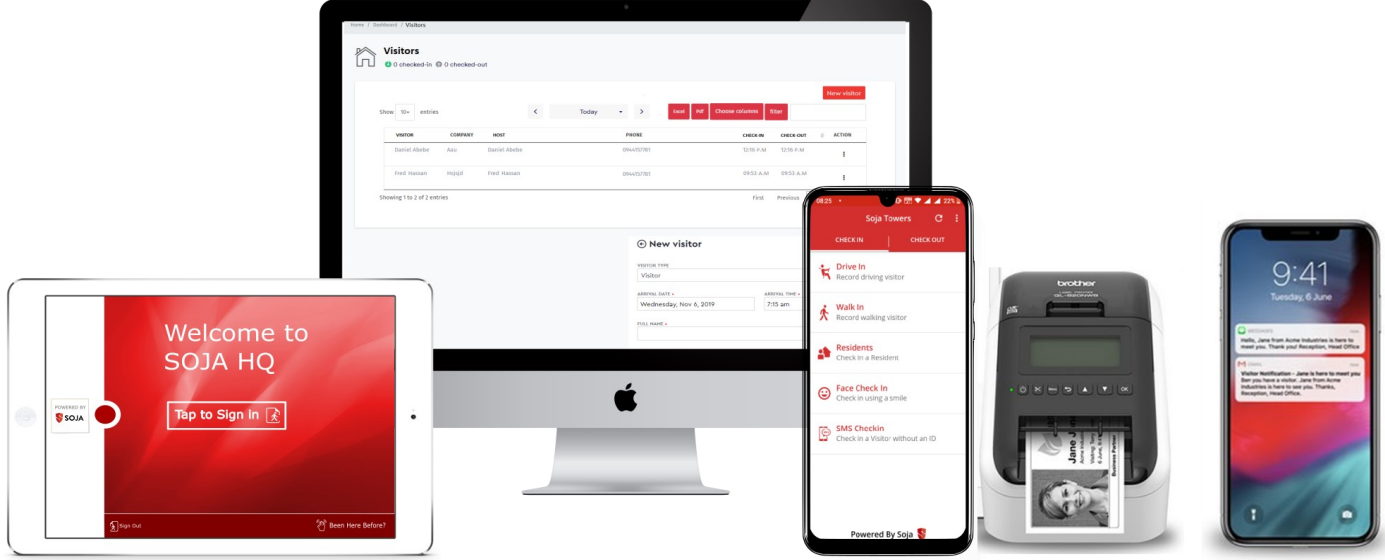

Centrally Manage Multiple Locations

Pre-booking and Appointments

Print Visitor Slips and Badges

Streamline your process

Soja doesn't just look good, it saves you valuable time registering visitors and notifying hosts. Yes, it's the little things that make the difference!

Quickly check in guests by scanning ID's, Passports or drivers licenses

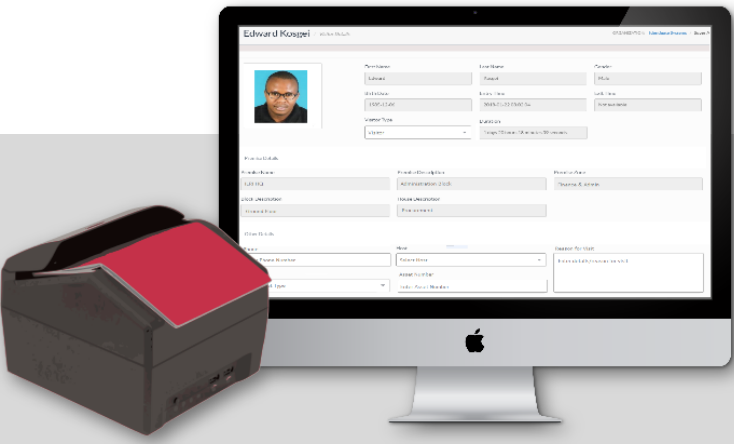

Notify employees of visitor arrivals Via Push Notifications, Email or SMS

Wirelessly Print Visitors Slips and Badges

Check in regular staff and residents via QR codes. Permanent codes may be printed on cards and vehicle stickers

ID Scan and Verification

Soja Assisted-Check-In (ACI) enables security personnel to authenticate government-issued ID with airport-grade scanning technology. Pair ACI with our Mobile -based automatic document data collection and verification for the experience and security required of today's enterprise.

Employees and Residents

SOJA isn't just for visitors. Our all-encompassing solution is the ultimate digital employee and residents in-out board.

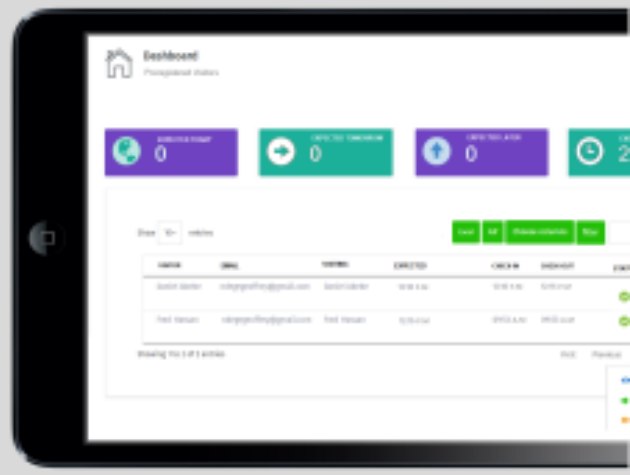

Employee and Residents Sign In-out

Know exactly who is on site in an evacuation event

Time tracking overview and run custom reports
